Internet and Web Systems 1

Week 2 Report

I accomplished the following tasks in the week 2:

1. I decided to finalize 'Bootstrap' as a Frontend framework for building my personal Webpage.
2. I also decided as rough look of my webpage as to what all information should it have, the look and feel of the webpage, etc.
3. On the project end, I am still researching for a good web app idea which really interests me.

[This week (September 25 – September 29) I was in Houston at the Grace Hopper celebration with Prof. Levkowitz himself to represent the University at the conference which is the reason I could not work more on the project.]
