Internet and Web Systems 1

Week 5 Report

I accomplished the following tasks in the week 5:

1. This week I accomplished the task of making the login and sign up page for the project.
2. I used the basics of HTML and CSS to achieve it.
3. The login page has field areas to enter the username and password. Along with that it has links to resetting the password if forgotten and also to sign up as a new user.
4. On clicking the 'Don't have and account link?', the user is redirect to a signup form where he can sign up using email or using Facebook/Twitter/Google.
