Internet and Web Systems 1

Week 2 Report

Tasks Achieved:

1. I completed my blog in this week. I added relevant information to all the different tabs that I had created last week.
2. I have also added my resume to it in the homepage.
3. On the likes and dislikes tab, I have added sub tabs in such a way that by clicking on it a new webpage won't be called instead will be loaded on the same webpage using JS and DOM.

Problems and Solutions:

1. I was not well versed with the JavaScript HTML DOM. I studied about it in detail and used it in my blog.
2. The other issue I encountered was being able to create the sub tabs. I couldn't load them on the same webpage. I created an object and loaded the information which I wanted to be displayed on it.
