Internet and Web Systems 1

Week 3 Report

I accomplished the following tasks in the week 3:

1. In this week I developed and implemented the basic design for the index page of my personal Webpage.
2. I have used Bootstrap, CSS, HTML and JavaScript to accomplish it.
3. I have made tabs such as 'Basic Information', 'Likes and Dislikes', 'Projects' and 'Connect with me'.
4. I have also added the languages I know on it.
5. At the end, I have added an 'LinkedIn' Icon and linked it to my LinkedIn,
6. For the Project, I have decided that I will make '**A web based portal for students to predict universities using machine learning'.**
7. I started researching and working to build a web app where the profile of the student will be rated based on his/her grades, GRE score, publications/projects and in turn suggests universities based on the calculated score.
8. I am trying to figure out how get the data of universities and scores all in one application.
